METHOD 1: MEASURE YOUR SIZE WITH A RING.

Print this page at its original size, making sure to set the print scale to 100% in the Print Settings menu. Place a ring you already own over the drawn circles to determine the one that matches your size. The diameter should match the inside of the ring, meaning the circle should be completely visible from inside your ring without leaving any space between the circle and the ring. If you're undecided between two sizes, we suggest choosing the larger one for greater comfort.
